

PERSONAL STATEMENT

Data Science and Artificial Intelligence Engineer, passionate about data analysis, machine learning, and developing intelligent applications. Driven by innovation and optimizing AI-based systems.

ACADEMIC BACKGROUND

Engineering Degree in Computer Science

University Ibn Khaldoun (2023 - present)

Bachelor's Degree in Telecommunications

ISITCOM - University of Sousse (2020-2023)

High School Diploma in Computer Science

Midoun High School (2019)

COMPETITIONS & LEADERSHIP

Participant - Hult Prize Competition

December 2020

- Developed an innovative project aligned with UN SDGs.
- Collaborated with a team to create a viable entrepreneurial solution.

Campus Director - Hult Prize

July 2021

- Organized and managed the Hult Prize competition on campus.
- Coordinated with students, mentors, and juries.
- Promoted social entrepreneurship and impact innovation.

SuperNova Competition - Homeless Detection App

April 2021

- Designed an application to detect homeless individuals.

CERTIFICATIONS

- Huawei ICT Competition - Cloud Track (Score: 390) - November 2021
- AWS Academy Cloud Foundations - November 2022

PROFESSIONAL EXPERIENCE

Internship - Embedded Systems | Eurotech Electronics

Remote - Canada | August 2024

- Gas concentration detection using MQ-2 sensor and ESP32.
- Developed an embedded system for air quality monitoring.

Internship - Cyber Park

July 2022 - September 2022

- Familiarized with IoT and embedded systems.
- Hands-on work with electronic boards.

Internship - Tangorythm

August 2020

- Developed a website using Angular and Node.js.
- Built a mobile application using Android Studio.

ACADEMIC PROJECTS

CO2 Emissions Prediction for Vehicles in Canada

January 2024

- Analysis and prediction using machine learning.
- Supported Canada's Zero CO2 initiative and UN SDG 13.

Capstone Project - Smart Bracelet for Alzheimer's Patients

September 2023

- Built with Arduino IDE and Porteus.
- Designed a mobile app for family members using Android Studio.

Intelligent System for Alzheimer's Patients

March 2025

- Behavioral detection and fall prediction via AI.
- IoT-based smart bracelet with cognitive exercises and mobile app.
- Immersive memory stimulation via AR/VR.

LANGUAGES

- Arabic: Native
- French: Bilingual
- English: Pre-intermediate

INTERESTS

- Volunteering | Theater | Music | Sports

TECHNICAL SKILLS

- Languages: Python, R, Java, C, PHP, SQL, HTML, CSS, JavaScript
- AI & Data Science: Machine Learning, Deep Learning, Pandas, NumPy
- Development: Angular, Node.js, Android Studio, Arduino IDE, AR/VR
- Networking & Telecom: Packet Tracer, LoRaWAN, Matlab
- OS & Virtualization: Windows, Linux (Ubuntu), VMware, VirtualBox
